

### **Professional Summary:**

- Around 10+ Years of professional experience in the following phases of Software development including Requirement's analysis and Debugging, Development, Maintenance, Installation, Implementation, and web applications.
- Strong knowledge of Software Development Lifecycle (SDLC) methodologies such as Agile-SCRUM, Waterfall- SCRUM (Hybrid) and Waterfall and analyze requirements/user stories at the business meetings and strategize the impact of requirements on different platforms/applications.
- Skillful in designing and developing applications using web technologies like Java, J2EE, Spring Boot, Backbone JS, Node JS, React JS, Restful web Services, JQuery, custom API's, HTML, CSS, w3DS which are compatible with both the desktop and mobile.
- Used Cypress and Test-Cafe to write E2E tests and automated them to the pipeline as a part of deployment process.
- Experience in developing Agile Methodology along with Test Driven Development (TDD).
- Experience on Android UI components such as List view, Customized List view, Menus, Compound Buttons, Alert Dialog boxes, Action bars, and Spinners for various layouts in Application development.
- Used React Chips to handle Forms and used to enter multi values on input field.
- Skilled at programming JAVA/J2EE applications using various IDE tools like Eclipse and NetBeans
- Adept in working with SQL databases like Oracle, MySQL, Dash DB.
- Experience in using Version Control Systems like GIT and Continuous Integration (CI) tools like Travis CI Proficient in Data Encryption.
- Good experience on working with Amazon Web Services like EC2, S3, Amazon Simple DB, Amazon RDS, Amazon Elastic Load Balancing, Amazon SQS, AWS Identity and access management, AWS Cloud Watch, Amazon EBS and Amazon Cloud Front.
- Good Knowledge of Amazon Web Service (AWS) EC2 and Continuous Integration with Jenkins.
- Selecting the appropriate AWS service based on compute, data, or security requirements.
- Experience in Integration of Amazon Web Services AWS with other applications infrastructure.
- Experience in working on Cloud Foundry Server environments like Bluemix.
- Proficient in Smoke testing, Black box testing, Integration testing and User Acceptance Testing (UAT) for verifying and validating the system by developing Test cases, Test scenarios using Selenium, Mocha & Chai, Junit.
- Experience on Model View Controller (MVC) based Web applications and implemented and enhanced CRUD operations in Ruby on Rails.
- Analyzed and benchmarked internal applications built using object-oriented Perl and java.
- Thorough understanding of SCRUM ceremonies including Backlog refinement, Sprint planning, Daily stand-ups, Sprint review and Retrospective meetings for each sprint
- Hands-on experience in using the Integrated Development Environments such as Eclipse, IntelliJ IDEA, Visual Studio, Visual Studio Code, WebStorm, Sublime text.
- Good experience on customizing CSS frameworks like Bootstrap and Foundation using CSS preprocessors LESS or SASS and Compass.
- Expertise in implementing easy to use Bootstrap plugins for building carousel, accordion, modal windows etc.
- Expertise in analyzing the Document Object Model (DOM) Layout, DOM Functions, and JavaScript functions, Cascading Styles across cross-browser using Firebug, Developer Toolbar.
- Expertise in React.js for creating interactive UI using One-way data flow, Virtual DOM, JSX, React Native concepts.
- Used CSS, ReactJs, redux, saga, thunk, react HOC, Material-UI, React Bootstrap, Axios, flux, MobX, nextjs, SASS, LESS, Lodash for applying style in entire applications. Developed web page applications that meet the requirements as specified by ARIA, WCAG
- Proficient in design and implemented intranet applications using Ruby on Rails and PostgreSQL on Heroku Cloud Packages and Triggers on databases like MySQL, PostgreSQL, and Oracle.
- Good experience in PWA Technologies.
- Expertise in Web Accessibility Initiative – Accessible Rich Internet Applications (WAI-ARIA).

- Experience in building flexible, reliable, efficient, and secure Enterprise and Web based applications using Spring MVC and Spring Web Flow frameworks.
- Diverse experience utilizing tools in Microservices architecture applications using Spring Boot, Spring Cloud config.
- Experience and building an isomorphic application using React.js and Redux with GraphQL on server side.
- Used Spring Boot at back end, which helps to develop application with ease.
- Used Spring Boot for building application with Spring initializers and bootstrapping the build configuration and develop custom solutions that act upon Jenkins's information in authentic time.
- Expertise in React Component for UX-Library consisted of Button, Checkbox, Input, Icons, Toggle Button, Dropdown, Multi-Level Dropdown and many more.
- Expertise in creating Templates, Mockups and Prototypes, Web Interfaces, Layouts and Flow of Future Pages.
- Result oriented and self-driven individual keen on learning new technologies, enhancing domain knowledge and undertaking challenging tasks to create business value.
- Excellent technical, analytical, problem-solving skills, strict attention to details, ability to work independently as well as in a team environment.
- Ability to write clear, well-documented, well-commented and efficient code for web development.
- Experience with User Acceptance Testing (UAT) and Accessibility Testing.
- Strong problem-solving, organizing, communication and planning skills, with ability to work in team environment.
- Good written and oral communication skills and Interpersonal skills with a strong ability to excel through collaboration with team members.

#### **Technical Summary:**

|                                     |                                                                                                                                                                   |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Programming /Frameworks</b>      | C, C++, JAVA, J2EE, J2SE, Python, Java 8<br>Bootstrap, Django, Angular JS, Objective C, SWIFT, iOS 8.x,9.x                                                        |
| <b>IOS Application</b>              | Objective-C, Swift (all versions), Cocoa2D and Cocoa development for iPhone and iPad devices in Xcode Interface builder, Xamarin, -UI Kit, Cocoa touch, Core Data |
| <b>Web Technologies/Services</b>    | HTML 4.01/ 5, CSS 2/ 3, XML, AJAX, JSON, DOM, Redux, MVC, SOAP, REST, Spring Boot, NFS                                                                            |
| <b>SDK</b>                          | Azure SDK 2015 for VS                                                                                                                                             |
| <b>Operating Systems</b>            | Windows XP /Vista /2000/ 7, Unix                                                                                                                                  |
| <b>Databases</b>                    | NoSQL, Oracle 11g/10g, MySQL, Mongo DB, Dash DB, Z/OS CLOUDANT.                                                                                                   |
| <b>IDE/Tools</b>                    | Visual Studio, Eclipse, Brackets, Notepad++, Photoshop, MS Office, Sublime Text, WebStorm, Android Studio.                                                        |
| <b>Cloud Computing</b>              | Amazon EC2, Amazon S3, Amazon RDS, AWS Lambda, Amazon SQS, AWS Identity and access management, AWS CloudWatch, Amazon EBS other services of the AWS family.       |
| <b>Debugger</b>                     | Chrome Developer Tools, Firebug, Bugzilla.                                                                                                                        |
| <b>Methodologies</b>                | Agile, Rational Unified Process (RUP), UML Waterfall.                                                                                                             |
| <b>Continuous Integration Tools</b> | Toolchain, Travis CI                                                                                                                                              |
| <b>Cloud Foundry</b>                | Bluemix                                                                                                                                                           |
| <b>Version Control Systems</b>      | GIT HUB, SVN, ClearCase, Xcode 3.0.                                                                                                                               |
| <b>Scripting Languages</b>          | Java Script, JSX, Backbone JS, Node JS, React JS, jQuery, React Native, Cocoa Touch, Kiwi Framework                                                               |

#### **Education:**

- Bachelor's in computer science from \*\*\*\*\*

#### **Professional Experience:**

**Client: Delta Airlines,**  
**Location: Atlanta, GA**  
**Sr Full Stack React Developer**

**Dec 2023 -Present**

**Responsibilities:**

- Involved in complete Agile/SDLC – Requirement Analysis, Development, System, and Integration Testing.
- Used Java, HTML, CSS, JavaScript, Hibernate, Spring Boot Framework.
- Implemented micro services architecture using Spring Boot for making application smaller and independent.
- Used Apache-tomcat container for local and development environment deploying API and core modules of the application.
- Implementing or exposing the micro services based on Restful API utilizing Spring Boot with Spring MVC.
- Proficient in Developing and deploying Java APIs with an understanding of both front end and backend technologies like HTML, CSS, JDBC, JSP, Hibernate, Restful web services and deploying using AWS platform.
- Developed a core component of Analytics with MVC frameworks - Angular and JavaScript design patterns.
- Created Single page applications with React using Hooks, redux for stateful management; or using previous react state object plus lifecycle for components internalize stateful management. Used react - router for routing.
- Involved in creating custom, general use modules and components that extend the elements and modules of core Angular.JS.
- Involved in designing in web pages using HTML 5, XHTML, CSS3, JavaScript, React.js, Redux, React-Bootstrap, Node.js, express.js, **Mongo DB**.
- The Redux-Thunk middleware was used with the Redux store to retrieve contract data via a REST ful API implemented on the backend in Node.js and Mongo DB. All development was done on Mac OS and the source code was managed via GIT.
- Developing enterprise grade mobile applications on iOS (Swift/Objective-C/React Native), knowledge of Apple's Human Interface Guidelines
- Unit test using Chai and Jasmine. E2E tests for user experience using Cypress.
- Used JIRA as the bug tracking system to track and maintain the history of bugs/issues on everyday basis.
- Developed a Micro service application with React.JS in front-end and Spring Boot services.
- Development of applications using Ruby on Rails (RoR) and REACT (.jsx) for Web Services Calls.
- Worked on AWS, EC2 server and s3 storage to deploy functional prototypes.
- Participated with SQA team in bug thrashing sessions to discuss and resolve bugs that were reported in JIRA.
- Developing Single Pages Application using HTML5, CSS3, Bootstrap, React JS, Next JS, GraphQL, Express JS, Node JS, Socket, LESS.
- Developed an internal application using React JS, Next JS, Express and Node JS for Relationship Mangers.
- Responsible for integrating interactive virtual assistance SDK in the code environment.
- Completed user research to identify opportunities for improving Event Omni's Mobile presence.
- Used Spring Boot properties like actuators and health checkers to enhance Microservice implementations.
- Implemented AWS client API to interact with different services as Console configuration for AWS EC2.
- Experience in Perl scripting and Unix Shell scripting.
- Experience in Jenkins for project build/test/deployment, Jest and Enzyme for react component testing, and JUnit for unit and integration testing.
- Used OAuth as a secure authorizing tool and implemented authorization on web services.
- Enhanced legacy application by building new components in Angular JS and Typescript.
- Used Micro service architecture, with Spring Boot-based services interacting through a combination of REST and leveraging AWS to build, test and deploy micro services.
- Developed the web application with the newest React features centralized with Hooks.
- Used IntelliJ IDEA for coding, debugging, and testing the application modules.
- Strong ability to learn existing applications quickly and to be able to make modifications
- highly proficient interpersonal skills and ability to self-manage tasks/timelines - highly effective communication & organization skills.
- Design and coding activities for availability, reliability, stability, manageability, scalability, and security.

- Developed highly secured function level authorizations at the service level, leveraging inbuilt Angular validations.
- Involved in the review and analysis of the functional specifications, and requirements clarification defects etc.
- Used OAuth tokens for secure access to server resources from external clients.
- Developed test cases and performed unit testing with Junit, using Mockito to create and inject mocked instances.
- Utilized Kubernetes and Docker for the runtime environment of the CI / CD system to build, test deploy.
- Developed robust form management system with complete CRUD capabilities in React Native, Redux, and Firebase.
- Developing a green field app large app using AWS Cognito, Lambda, API gateway, node backend, PostgreSQL, and React /redux front end.
- Maintain ADA compliance HTM/CSS code and Web Content Accessibility Guidelines (WCAG).
- Good Experience in React.js for creating interactive UI's using One-way data flow, Virtual DOM, JSX, React Native with hooks concepts.
- Enough knowledge in RDBMS Design, DB normalization, ER modeling, SQL, PL/SQL, procedures, cursors, functions, triggers.
- Worked with Relational Database Management Systems including Oracle, SQL Server and PL/SQL and have worked extensively on JDBC to connect to and access various remote databases including Oracle, MySQL, SQL Server.
- Expertise with RDBMS concepts like Functions, Triggers, Stored Procedures, SQL, and PL/SQL Packages.
- Configuring the Docker containers, creating Docker files for various environments, and working on Kubernetes environment.
- Developed the User Interactive web pages in a professional manner using web technologies like HTML, XHTML and CSS based on the W3C and ADA standards.
- Managed Docker orchestration and Docker containerization using Kubernetes.
- Used PostgreSQL as the primary data store, created, maintained databases using PL/SQL.
- Developed PL/SQL's functions and stored procedures for supporting the data transfer.
- Experience in SQL, PL/SQL, stored procedures, functions, triggers, and packages within Oracle DB.
- Involved in requirements gathering, designing, developing, testing, and deploying backend procedures, function & packages in PL/SQL particularly for maintaining payments.
- Used Kubernetes to orchestrate then deployment, scaling, and management of Docker Containers.
- Developed CI/CD system with Jenkins on Kubernetes container environment, utilizing Kubernetes and Docker for the runtime environment for the CI/CD system to build, test, and deploy.

**Environment:** Java, J2EE, Restful Web Services, Spring, Mongo DB, Hibernate, Spring Boot, micro services, Angular JS, jQuery, Angular, AWS, JMS, Junit, Mockito, Maven, Oracle, CI/CD, Hooks, JavaScript, EJB, JDBC, HTML5, CSS3, XML, NFS, SQL, AJAX, NextJS ,Apache Tomcat, OAuth, WebLogic Server, GraphQL, Python, Perl, Apache Tomcat, IntelliJ, Visual Studio Code, Git, Postman, Jenkins, JIRA.

**Role: Sr Full Stack React Developer**

**Client: TIAA**

**Apr 2023 to Nov 2023**

**Location: Charlotte, NC**

**Responsibilities:**

- Designed the front-end applications, user interactive (UI) web pages using web technologies like HTML, XHTML, and CSS.
- Web designing & development using HTML5, CSS3, JavaScript, React Js and Ajax.
- Developed React Js pages, Web services calls, and AJAX calls for the application.
- Used in development of the web application to bind the data/model that is being retrieved from a database through services provided in a controller to the view using scope.
- Used React Js in components like JSX, creating React components, Virtual.
- Participated with end users and business analyst to understand the business requirements.
- CSS styles were developed to preserve the uniformity of all the screens throughout the application and positioning of screen objects.
- Good knowledge and hands on experience with Angular and Typescript.
- Performed UNIT testing with Junit and used Mocha and Chai for JavaScript framework and Cypress for e2e testing.

- Responsible for design and development of web pages from mock-ups (PSD).
- Worked on Front end by using JavaScript.
- Developed user interface by using React Js, Flux for SPA development.
- Implemented client-side Interface using React Js.
- Worked in using React Js components, Forms, Events, Keys, Router, Animations and Flux concept.
- Build React components and stand-alone functions to be added to any future pages.
- Responsible for developing a front-end application using React Js and FLUX architecture for internal team's productivity use.
- Implement the JavaScript/jQuery frameworks such as React JS, Node JS for MVW/MVC framework
- Experience in building isomorphic applications using React.js and Redux with GraphQL on server side.
- Experienced in React Js and working with React Flux architecture.
- Working with React Router for developing Single Page Applications SPAs.
- Implemented the Drag and Drop functionality using React -Draggable thoroughly performed unit testing and integration testing.
- Extensively used SASS (Syntactically awesome style sheets) while styling with CSS3.
- Used Firebug for debugging and for element styling.
- Developing mobile applications on iOS with knowledge of Apple's Human Interface Guidelines
- Wrote services to store and retrieve user data from the Mongo DB for the application on devices.
- Involved in daily SCRUM meetings to keep track of the project status.
- Used web-based GIT repository manager with issue tracking features.
- Made the application responsive using Bootstrap and CSS Media Queries.
- Responsible for checking cross browser compatibility issues and hence worked on different browsers like Google chrome, Internet explorer, Firefox, and safari.
- Experienced in implementing CRUD database operation on such as MongoDB.
- Developing mobile applications on iOS (Swift/Objective C), knowledge of Cocoa Touch, Universal app for both iPhone and iPad.
- Used Jasmine and Karma as end-to-end testing tools for debugging and software quality insurance.
- Worked with Business Analysts for requirement gathering and requirement analysis.
- Created Use cases, ER diagrams and user flow control.

**Environment:** HTML/HTML5, DHTML, CSS/CSS3, SASS, AMD, OOJS, TypeScript, GraphQL, Ember.js, Bootstrap, PHP, ExpressJS, React JS, React Native, Flexible framework, NextJS, Backbone Js, visual studio 2010, JavaScript, AJAX, jQuery, Java, AngularJS2.0, Hooks, GraphQL, Typescript, Node JS, XML, XHTML, DOM,c MySQL, NPM, MongoDB, MVC Architecture, Apache, Tomcat.

**Role: Sr React Developer**

**Client: AT&T**

**Feb 2021 to Mar 2023**

**Location: Dallas, TX,**

**Responsibilities:**

- Design develops and test HTML5, CSS3, Bootstrap, JavaScript, jQuery and React.JS that meet accessibility and web browser standards for websites.
- Designed CSS templates for use in all pages on the website working with CSS Background, positioning, text, border, margin, padding, and table.
- Applied optimization techniques to reduce page size and load times to enhance user experience using sprites.
- Developed user interface by using React JS, Flux for SPA development.
- Implemented react JS code to handle cross browser compatibility issues in Mozella, IE 7, 8, 9, Safari and FF.
- Developed UI using ReactJs and Redux and Next JS.
- Performed UNIT testing with Junit and used Mocha and Chai for JavaScript framework and Cypress for e2e testing.
- Developed and tested many features in AGILE environment using Ruby on Rails, HTML, CSS, JavaScript, Bootstrap, Rspec.
- Used React-Router to turn application into Single Page Application
- Worked in using React JS components, Forms, Events, Keys, Router, Animations and Flux concept.
- Used Web services (SOAP and RESTful) for transmission of large blocks of XML/JSON.

- Worked on responsive design and developed a single ISOMORPHIC responsive website that could be served to desktop, Tablets and mobile users using React.js.
- Used Spring Boot which is radically faster in building cloud Microservices and develop Spring-based application with very less configuration.
- Maintained states in the stores and dispatched the actions using redux.
- Implemented the Drag and Drop functionality using React-Draggable.
- Have good idea on Rest API and Web Services in Python.
- Created Test script in Perl/Unix from automation and Ran the Test and validated results.
- Used React-Autocomplete for creating google map's location search on the webpage Added Excel-Builder to download the Tabular data in Excel format using react.
- Used Excel Builder 3rd Party open-source library and tweak it to make sure it will work with IE11.
- Used flickity.js for creating carousel-images.
- Experience in building isomorphic applications using React.js and Redux with GraphQL on server side.
- Components for UX-Library consisted of Button, Checkbox, Input, Icons, Toggle Button, Dropdown, Multi-Level Dropdown and many more.
- In Phase Two, worked closely with the Back-End team to display data using the Custom Components, library Components, and Redux.
- Used Middleware, Redux-Promise in application to retrieve data from Back-End and to also perform RESTFUL services.
- Experience on AWS services like lambda, S3 and EC2, experienced in developing the API using Lambda function.
- Added Dynamic Functionality by creating and dispatching Action Creators that deployed Actions.
- Created and used Reducers that received said Actions to modify the Store State Tree.
- Optimized animation logic with optimistic functions to increase performance in rendering.
- Worked with backend engineers to optimize existing API calls to create efficiencies by deprecating unneeded API calls.
- Embedded PHP & HTML formatting and JavaScript Validations.
- Called the Restful web services calls for POST, PUT, DELETE and GET methods.
- Have worked on AWS to fetch the pictures files from AWS to UI.
- Used React flux to polish the data and for single directional flow.
- Used Object Oriented Programming concepts to develop UI components that could be reused across the Web Application.
- Developed a fully functional prototype application using JavaScript (jQuery and Backbone.js) and Bootstrap, connecting to a REST service hosted on AWS using API Gateway and DynamoDB.
- Extensively used Git for version controlling and regularly pushed the code to GitHub.
- Used JIRA as the bug tracking system to track and maintain the history of bugs/issues on everyday basis.
- Worked with JASMINE unit test framework to write unit tests for JavaScript code.
- Extensively used debugging tools such as Firebug and IE Dev tools to investigate the issues and fix the bugs.
- Monitoring the offshore work and providing technical help to the offshore team for their JIRA tickets.
- Interacted with Testing Team, Scrum Masters, and Business Analysts for fixing of Issues.
- Performed the System Testing, Regression Testing for Complete UI after fixing the Issues which are reported by Testing Team.

**Environment:** HTML 5, CSS3, Sass, Less, JavaScript, Bootstrap, Robust, Ajax, React JS, Redux, Flex, My SQL, XML, XSL, XSLT, JSON, Git hub, Restful API, Typescript, CI/CD, AWS, NextJS, GraphQL, DynamoDB, JIRA, Jasmine, and Web Strom.

**Client:** Johnson & Johnson

**April 2018 to Jan 2021**

**Location:** DesMoines, IA,

**Role:** React JS Developer/ React Native

**Responsibilities:**

- Working in designing the user interface for the application.
- Used React Material UI components as reusable components.

- Involved in designing and developing the web pages using HTML5, CSS3, JavaScript, JQUERY, Material UI, React.js, Redux, Flex, Rest API.
- Worked on React JS Virtual Dom and React views, rendering using components that contains additional components called custom HTML tags.
- Involved in implementing various screens for the front end using React.js and used various predefined components from NPM (Node Package Manager) and redux library.
- Experience in Integration of Amazon Web Services AWS with other applications infrastructure.
- Setting up AWS Oracle RDS databases for new project, use data pump to migrate data to Relational Database Services (RDS).
- Selecting the appropriate AWS service based on computer, data, or security requirements.
- Integration of Amazon Web Services (AWS) with other applications infrastructure.
- Involved in writing Java API for Amazon Lambda to manage some of the AW'S services.
- Used Amazon Cloud Watch to monitor AWS services and Amazon Cloud Watch logs to monitor application.
- Implemented stable React components and stand-alone functions to be added to any future pages.
- Developed a fully functional prototype application using JavaScript (jQuery and Backbone.js) and Bootstrap.
- Responsible for React UI. Building components library, including Tree, Slide-View, and Table Grid.
- Used React JS for templating for faster compilation and developing reusable components and worked on React workbook.
- Used React-autocomplete for creating google maps location search on the webpage.
- Configured Web pack to execute linters, magnifiers, pre/post-processors, tests, transpires, etc. based on build target.
- Used JIRA to keep track of outstanding bugs.
- Selecting the appropriate AWS service based on compute, data, or security requirements.
- Experience in Integration of Amazon Web Services AWS with other applications infrastructure.
- Integrated GRADLE build and designed workflows to automate the build and deploy process.
- Participated in code review, mentoring sessions, and used GIT as version control for GIT interactions.
- Involved in understanding the responsive web design principles and making the site responsive without using bootstrap framework.
- Handled cross browser/platform compatibility issues (IE, Firefox, and Safari) on both Windows.
- Building the client-side application integrating with Rest API's.
- Developed server-side application to interact with database using Spring Boot and Hibernate.
- Used Spring MVC with to build the application on server side.
- Handed on Spring FTP Integration for transferring data to remote FTP server.
- Used Angular JS framework where data from backend is stored in model and populated it to UI and used DOJO for JavaScript.
- Developing REST API web service using Node JS with swagger documentation.
- Involved in writing unit testing for JavaScript React/redux.

**Environment:** HTML5, CSS3, ES6, React JS, Redux, Spring Boot 1.4.x, Hibernate 4.x, AWS (Amazon Dynamo DB, Amazon SQS, Python, Amazon Cloud Watch, Amazon Lambda), MySQL database, ML-database, GIT, Jenkins, JIRA.

**Client:** Oracle, Bangalore, India

**Jan 2016 to Nov 2017**

**Role:** React Developer

**Responsibilities:**

- Developed a new mobile application on Android and IOS.
- Building reusable components and front-end libraries for future use.
- Good Experience in React JS for creating interactive UI using One-way data flow,
- Virtual DOM, JSX, React Native concepts.
- Responsible for porting an existing web application into mobile view.
- Responsible for design and development of various components such as tab bars, map view, image picker, date picker, push notifications, sign-in/out features, profile management and navigation using react-native.

- Good Experience in React JS for creating interactive UI using One-way data flow, Virtual DOM, JSX, React Native concepts.
- Worked on an Agile Development Team to deliver regular updates to business team and project managers.
- Involved in designing and developing web pages using HTML5, CSS3, JavaScript, Bootstrap, SASS, LESS, React JS, Redux, Flex, Mongo db.
- Experience working with React-native /Redux.
- Good Experience in React JS for creating interactive UI using One-way data flow, Virtual DOM, JSX, React Native concepts.
- Experience in developing Android Application using Android Studio, Eclipse IDE, Android SDK, ADT plug - in.
- Very Good understanding of Android Back end and UI guidelines.
- Designed and developed mobile applications for Android mobile devices with extensive user interface development.
- Implemented unique design for portrait and landscape mode.
- worked on an iOS/Android project using React Native framework.
- Worked on React JS Virtual Dom and React views, rendering using components which contains additional components called custom HTML tags.
- Involved in implementing various screens for the front end using React Js and used various predefined components from NPM (Node Package Manager) and redux library.
- Services to properly consume API on the front end and send back data in JSON format.
- Worked in using React JS components, Forms, Events, Keys, Router, Animations, and Flux concept.
- Used Node and NPM to run Webpack tasks and build properly the project.
- Implemented generic component into node modules to integrate with designs and requirements.
- Experienced consuming APIs using Axios and manipulating/consuming JSON objects.
- Worked with CDK custom build components developed using HTML5, LESS, SASS, React.
- Worked with React and Redux Firefox Firebug and Google chrome JavaScript debugger.
- Worked with the GIT version controller.
- Used Fetch, JSON to send requests to the server to check the functionality of the websites.
- Involved in complete SDLC – Requirement Analysis, Development, System, and Integration Testing.
- Handled cross browser/platform compatibility issues (IE, Firefox, and Safari) on both Windows.
- Used JIRA to keep track of outstanding bugs to reduce downtime, increase productivity, and improve communication.

**Environment:** React JS, Redux, Redux, JSON, JavaScript, Typescript, ES6, Babel, Gulp, NPM, Html5, LESS, SASS , Spring Boot

**Client:** Xicom Technologies, India

**Sep 2014 to Dec 2016**

**Role:** Developer

**Responsibilities:**

- Designing, developing, and testing the web application by using the HTML5, CSS3, Bootstrap, React.JS and Redux
- Designing the CSS templates for use in all pages on the website working with CSS Background, positioning, text, border, margin, padding, and table.
- Applied optimization techniques to reduce page size and load times to enhance user experience using sprites.
- Developed user interface by using React JS, Redux for SPA development.
- Involved in responsive design and developed a single ISOMORPHIC responsive website that could be served to desktop, Tablets and mobile users using React.js.
- Developed client-side Interface using React JS.
- Worked as Cloud Administrator on Microsoft Azure
- Created an application using React Native framework for both iOS & Android.
- Strong hands-on experience with Spring IO, Spring Boot with Thyme leaf.
- Experience in implementing Java EE design patterns such as MVC, Singleton, and Business Delegate in the development of multi-Tier distributed Enterprise Applications.
- Used React-Autocomplete for creating google map's location search on the webpage.
- Added Excel-Builder to download the Tabular data in Excel format using react.
- Using excel builder 3rd Party open-source library and tweak it to make sure it will work with IE11.

- Creating new React/React-Native components, containers, services, and APIs for prototypes.
- Created and used Reducers that received said Actions to modify the Store State Tree.
- Maintained states in the stores and dispatched the actions using redux.
- Working with ECMAScript 6 features. For build of JSX and ES2015 (ES6) Babel, web pack.
- Used Middleware, Redux-Promise in application to retrieve data from Back-End and to also perform RESTFUL services.
- Optimized animation logic with optimistic functions to increase performance in rendering.
- Works with backend engineers to optimize existing API calls to create efficiencies by deprecating unneeded API calls.
- Used Restful web services to call for POST, PUT, DELETE and GET methods.
- Utilized React for its efficient data flow architecture to create a lightweight and render efficient web app that searched projects via the GitHub API through keywords.
- works on AWS to fetch the pictures and Videos from AWS to UI.
- Used Git for version controlling and regularly pushed the code to GitHub.
- Used HP Quality Center as the bug tracking system to track and maintain the history of bugs/issues on everyday basis.
- Works with JASMINE unit test framework to write unit tests for JavaScript code.
- Extensively used debugging tools such as Firebug and IE Dev tools to investigate the issues and fix the bugs.
- Knowledge on Node.js environment set-up and interacted Node Service team to get the Service.
- Interacted with Testing Team, Scrum Masters, and Business Analysts for fixing of Issues.
- Interacted with Customers and development teams for Fix the Issues.
- Performed the System Testing, Regression Testing for Complete UI after fixing the Issues.

**Environment:** HTML5, CSS3, Sass, Less, JavaScript, Bootstrap, ReactJS, Redux, Ajax, MySQL, XML, XSL, XSLT, JSON, GitHub, Restful API, Typescript , AWS, Mongo dB, HP Quality Center, Jasmine and WebStorm
